CANADIAN HOSPITAL DIRECTORY

- Hospitals and nursing institutions
- Educational programs for personnel
- Associations and allied organizations
- Buyers' guide: equipment and supplies

CANADIAN HOSPITAL COUNCIL

Preface

FOR many years there has been a mounting demand for various types of directory service in the hospital field. Several directories have been produced by hospital organizations in the United States and by provincial and federal governments in Canada. All have served a useful purpose and continue to do so.

However, while the number and types of directories have increased, hospitals in Canada have not produced a compact directory designed primarily for their own use. In spite of the numerous directories on hospitals and related fields there has remained an increasing need for the publication of a current directory aimed specifically at the Canadian field and embodying several types of information. This has led the Canadian Hospital Council to its decision to publish the Canadian Hospital Directory.

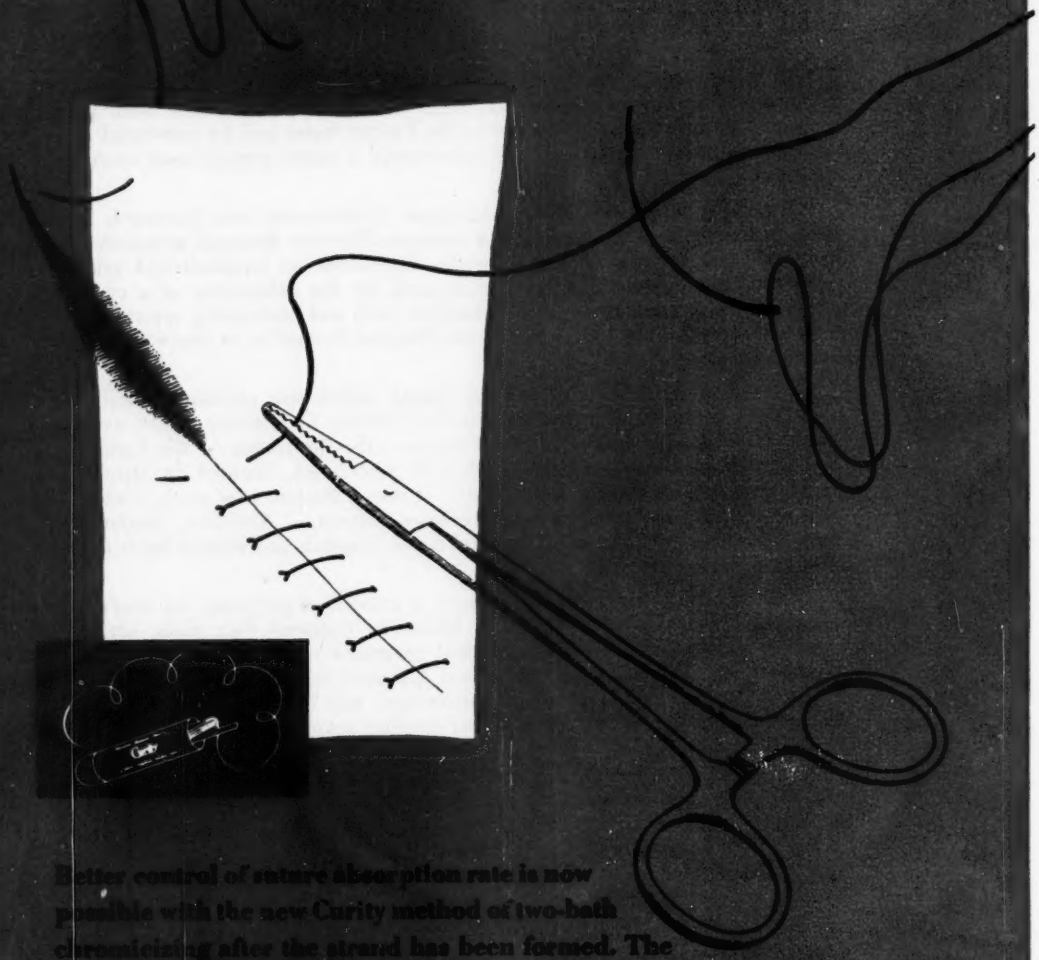
The first publication to our knowledge, which was exclusively designed to list hospitals in Canada, was compiled in 1929 by Dr. Harvey Agnew as Secretary of the Department of Hospital Service (the forerunner of the Canadian Hospital Council) of the Canadian Medical Association. Entitled "A Directory of the Hospitals of Canada with Maps", it was a monumental work. This service was later transferred to the Dominion Bureau of Statistics, Institutions Branch, which now issues statistical reports on hospitals and related fields under several different covers.

In order that one volume may serve a number of purposes, for ready reference, the new Canadian Hospital Directory contains four main sections. These are: hospital listings; educational programs in the hospital field, with approved nurses' training programs and approved hospitals for internships; a listing of hospital and associated organizations; and buyers' guide, listing Canadian manufacturers and distributors of hospital supplies and equipment. Every effort has been made to verify all information. However, the expansion of hospital facilities is continuing so rapidly that statistics are soon rendered obsolete. We, therefore, express regret for any omissions or errors that may be noted. If the Canadian Hospital Directory proves to be as useful a service as anticipated, it will continue as an annual publication. The directory may then be improved and enlarged as errors or omissions are drawn to our attention and as further needs for directory service are made known.

The Canadian Hospital Council gratefully acknowledges the assistance of hospital administrators, hospital and allied organizations, departments of government, and the support of advertisers, all of whom have made this publication possible.

Curity chromic sutures

are chromicized with two baths for dependable absorption



Better control of suture absorption rate is now possible with the new Curity method of two-bath chromicizing after the strand has been formed. The first bath does *not* "tan" but permeates the strand. The solution used in the second bath combines with the molecules of the first, within the strand, achieving total, even chromicization from rim to center. As a result absorption is similarly uniform. By this method the plies are bonded by their natural sinein.

MANUFACTURERS AND DISTRIBUTORS OF SPECIALIZED CLEANERS AND ALKALIES

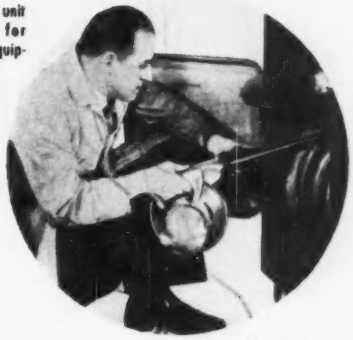
4 IN 1

ONLY **TORNADO**® GIVES YOU

4 cleaning tools in 1 machine

High-powered vacuum cleaner for wet or dry pickup.

Removable power unit is conveniently slung from carrying strap for cleaning confined areas.



Removable power unit becomes blower for cleaning motors, equipment, machinery.

Removable power unit with spray tank becomes unsurpassed sprayer.

Tornado—the machine for modern cleaning, provides you with 4 efficient, functional cleaning tools in one machine. Use it as:

1. A conventional, high powered tank-type vacuum cleaner—with unmatched performance. It picks up dirt, as well as scrubbing solutions, leaves floors immaculate and bone dry.
2. Just remove the motor unit, and with bag and shoulder strap attached, operators can clean narrow stairways, halls and other confined areas.
3. Attach a rubber nozzle to the motor unit and presto, you have a portable hand blower that blasts dirt and lint from motors and equipment.
4. Add a feather-light spray tank to the motor unit and discover how easy it is to do a faster, more thorough job of spraying insecticides, disinfectants and deodorizers.

Buy Tornado—the machine with extra power (moves air faster than 300 m.p.h.) for better cleaning on every job. For complete information write

Size 1 Model SBV Size 2 Model V

Two New Centrifuge Models

THE New International Size 1 Model SBV and Size 2 Model V Centrifuges embody the many time-proven features found in their predecessors — the Size 1 Type SB and Size 2 machines — and in addition incorporate important engineering improvements. A transformer-type speed controller replaces the resistance rheostat heretofore used and the Centrifuges are now shipped to you mounted on a permanently attached sub-base equipped with casters.

Speed Controller

Stepless, uniform speed control throughout the entire range is achieved and troublesome heating of — and heat radiation from — the controller is eliminated. Controller and two-hour automatic timer are mounted in an attractive enclosing cabinet conveniently located on the side of the Centrifuge steel guard.

Sub-Base Mounting

No assembly of any kind is necessary. No separate portable stand to bother with. Simply uncrate the completely assembled unit, wheel it to the electric outlet and plug it in. Specially designed vibration dampeners, incorporated in the sub-base, provide maximum absorption of horizontal and vertical vibration and prevent their transmission to the floor of the laboratory.

Accessories

All interchangeable heads, shields, cups, and attachments listed for the discontinued SB and Size 2 machines fit the new models. Thus the Model SBV and Model 2V offer the same versatility and adaptability to your requirements. Send today for descriptive Bulletins V-1 and V-2 containing complete details.

A POINT TO REMEMBER

B-D NEEDLES

DESIGNED FOR PATIENT COMFORT

Every B-D needle point is precision ground for extra sharpness, assuring maximum patient comfort. Longer tapered points provide easier penetration, while correctly angled side bevels hinder seepage and afterpain. Flat, smooth heels minimize tearing or "plug-cutting" of skin.

Made of hyperchrome stainless steel, B-D Needles are:

rust-resistant throughout
stiff enough to pierce tissues easily
flexible enough to bend without breaking
hard enough to hold a sharp point
tough enough to assure long use

Write Dept. 21-B for illustrated B-D Needle Standardization Chart

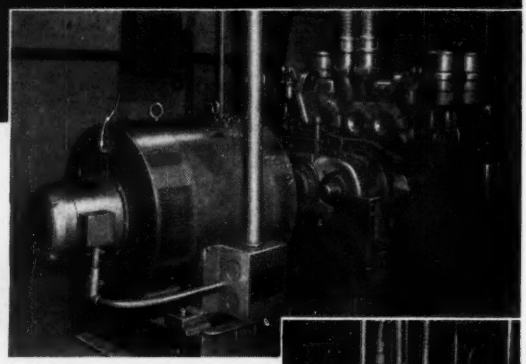
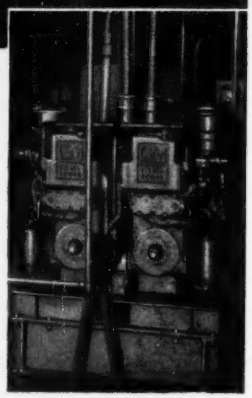
Rely on GM DIESEL POWER



This hospital installation of 175 KW generator, driven by a GM series 71 Diesel, automatically "cuts in" if regular power fails.



The picture illustrates the space-saving compactness of the GM 2-cycle Diesel. Parts are light in weight and easily accessible.

Because it often means the difference between life and death, Canadian hospitals are turning to General Motors Diesel Engines to drive stand-by generators for emergency power and lighting.

Factories, department stores, hotels, apartments and public buildings of all kinds need reliable stand-by power. They need a unit that delivers a full load in seconds; that starts and "cuts in" automatically despite heat or cold; that burns less volatile fuel. Economy is an important consideration. And General Motors Diesel Engines have been proven in every case.

For your emergency power problems, investigate GM Diesel Power first. Contact your local GM Diesel distributor, or write us direct, for full details.

Add **AUDIO** easily to your present **VISUAL** nurse call system of corridor domelights

Executone's Audio-Visual Nurse Call System Cuts Foot Travel in Half!

Easily and quickly added to your present visual domelight system, Executone frequently uses *existing* conduits or raceways—providing you with a *modern* Audio-Visual Nurse Call System! All accomplished with no interruption of service during installation!

Many hospitals—old and new—are discovering the economy and efficiency of Executone's Audio-Visual system. More patients are handled with *less effort, in less time!* One hospital reports that Executone has reduced operating costs 8% per bed. *It is an invaluable aid in relieving the nurse shortage.*

By pressing a bedside button, the patient activates signals at three locations—chime and light on nurse's control station, corridor domelight, buzzer and light on duty stations. The nurse presses key to reply . . . Executone's Call System may be installed complete, added to existing domelight systems, or installed without domelights.

FOUR MORE *Executone* SERVICES

1. *Radio-Sound Distribution System* provides patient with entertainment programs through individual "pillow speakers".

2. *Doctors' Call System* locates doctors instantly, anywhere in the hospital.

3. *Bed Occupancy Monitor*© alerts nurses when a "bed restricted" patient tries to get out of bed.

4. *General Administrative Intercom* coordinates activities between departments and individuals.

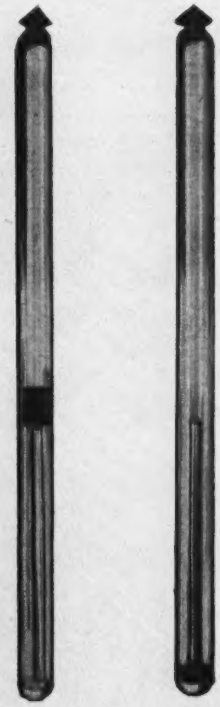
INFORM CONTROL

(Infant Formula 230° Control)



Before After

An Aid in Control of Infant Diarrhoea

Terminal processing of formula at 230° requires a time factor of 10 minutes. Such a short period is recommended because of possible damage to the milk. The danger in use of such a *short* 10 minute exposure at 230° (general autoclaving requires 30 minutes at 250°) can be offset by use of new Inform Controls. Thus if the milk is slow in heating inside the bottles Informs will tell you. If your autoclave is not highly efficient and the thermometer is incorrect Informs will tell you.

In general you will find Informs as necessary as Diacks because you are working on *"the edge of sterilization."*

FREE Samples upon Request — from your dealer or—from the manufacturer.

DIACK CONTROL

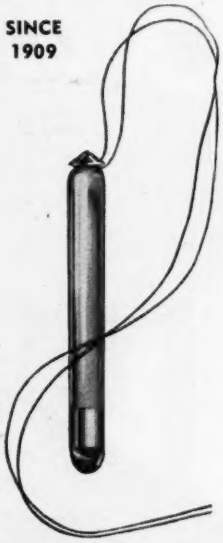
(GENERAL PURPOSE 250° CONTROL

POSITIVE PROOF OF STERILIZATION

SINCE 1909

The Diack Control

is a fusible tablet hermetically sealed in glass. The sealed-in tablet will melt only when subjected to a sterilizing temperature and is not affected by age, storage or any other possible condition.



Diack

How the Diack Control Works

One Diack is placed in the Center of each of the largest and densest packages in the autoclave so that the attached threads remain visible. When the Autoclaving is completed, the door is opened and the glass tubes are pulled out by means of the attached threads. If the tablets are melted the sterilizing temperature has penetrated to the centers of the packages.

Diack Controls should be used also with sterilization of rubber goods and liquids (except infant formulas).

IT IS IMPOSSIBLE TO PROVE HEAT PENETRATION BY *ANY KIND OF OUTSIDE GAUGE OR THERMOMETER

DIACK CONTROLS ARE PACKED 100 TO THE BOX
WHITE OR BLACK THREAD IS OPTIONAL

*Other than a Thermocouple which is impractical for routine sterilization.

Ideal INTERCHANGEABLE SYRINGES

The great improvements and many advantages of a syringe with perfected interchangeable barrel and plunger are obvious. If either barrel or plunger becomes broken it is now possible to order only the broken part, with complete confidence that a perfect fit will result between the old part and its new companion piece.

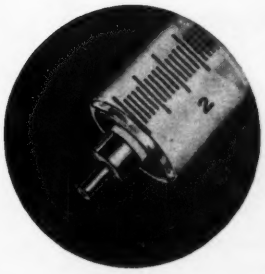
Combining our newly patented Embedded Indelible Graduations* with a perfected system of interchangeable parts we have produced a syringe which is as perfect as a syringe can be.

Barrel and plunger are of Kimble Resistant glass famous for its ability to withstand deterioration under repeated sterilization and also to resist sudden thermal changes. Scientific annealing eliminates any breakage due to internal strains.

Any Ideal Interchangeable Plunger plus any Ideal Interchangeable Barrel of same size equals a complete Ideal Interchangeable Syringe with *perfect fit*.

* Protected by U. S. Patent No. 2505411 April 25, 1950

No longer is it necessary to painstakingly match serial numbers on plungers and barrels. With perfected interchangeable parts any plunger and any barrel of identical size can quickly and easily be assembled with assurance of perfect fit.



Minimum breakage and safety of operation are the salient characteristics of this Ideal *Interchangeable* Syringe, equipped with Luer-gauged Metal Tip.

The Ideal *Interchangeable* Syringe with *permanently* attached, positive-locking tip is especially advantageous in spinal and tonsil work.

CUT YOUR COSTS with modern "COUCH-CALL" COMMUNICATION

by providing . . .

INCREASED STAFF EFFICIENCY
HAPPIER WORKING CONDITIONS
GREATER PATIENT COMFORT

"Couch-Call" nurse-to-patient communication provides central, constant contact between nurse-attendant and ***all*** rooms on the floor without walking a step!

To answer a light or buzzer signal the nurse simply picks up her COUCH-CALL handset and talks WITH THE PATIENT. Many steps are saved and patients receive faster, more alert attention . . . yet patient-to-nurse communication is private.

Nurse may listen in on all rooms simultaneously . . . to hear and to isolate the abnormal sound or irregular breathing which means trouble. COUCH-CALL is not a substitute for nurse's regular rounds. It *supplements* her calls with constant patient supervision. Patients' radio entertainment with under-pillow speakers may also be included.

Compact and attractive, the COUCH-CALL requires a minimum of maintenance. Any necessary replacement parts are standard and may be obtained locally.

- NO TIME WASTED OVER LOST KEYS!
- NO KEY RECORDS TO KEEP!
- NO PILFERING!

WHEN ORDERING LOCKERS, INSIST ON HANDLES ADAPTED TO TAKE PADLOCKS

There is no need for a busy hospital to tolerate the disruptions and delays that arise when locker keys are lost, mislaid, or forgotten . . . And there is no need to continue the useless task of keeping key records.

All the advantages of a modern protective system are offered by Dudley Combination Padlocks at a competitive price. No keys to worry about . . . No possible clues to combinations . . . No theft complaints . . . Adequate control of lockers by a simple Master Chart.

And one further advantage—Hospital nurses all graduate from schools and colleges where Dudley padlocks are virtually in universal use . . . Your staff already know, like and trust them!

It will pay you to write for further information, specifications, and prices.

For Finishing Of...

UNIFORMS, DUCK COATS and PANTS

depend on Pantex

Two specific features make it possible for you to depend on Pantex Utility Apparel Presses for the good, high-speed finishing. The first is the "king-sized" buck design that makes long lays quick and easy. Pantex design also permits most short-coat garments, such as pajamas and butcher coats, to be done double lay.

The second big feature is the fact that Pantex Presses *don't have the gadgets that cause 85% of laundry air press down-time troubles.* There's no cams, packings, diaphragms, push buttons and multiple air cylinders and hoses!

Among many desirable features, Pantex offers *dynamic leverage, two-hand safety controls, single air cylinder, master valve, air hose, and hydraulic oil cushion*—in addition to *tension springs* and *automatic pressure adjustment* between head and buck. For descriptive literature and suggested unit layouts, see your Pantex Representative today.

Hospitals and Nursing Institutions

Hôpitaux et autres institutions semblables

Arrangement—Disposition des renseignements

There are 11 divisions of the list of hospitals and nursing institutions on the following pages. These are arranged geographically by provinces from west to east, followed by the institutions in the Yukon and Northwest Territories.

The arrangement within each division is alphabetical by city, town or post office. Where two or more institutions are located in the same town or city, the arrangement is alphabetical by hospital names.

Institutions located in suburban localities are listed under the main metropolitan area to which they are adjacent.

Il y onze divisions de la liste des hôpitaux et autres institutions semblables sur les pages suivantes. Celles-ci sont disposées géographiquement par provinces de l'ouest à l'est, suivies des institutions dans le Yukon et les Territoires du Nord-ouest.

La disposition à l'intérieur de chaque division est alphabétique par cité, ville ou bureau de poste. Dans le cas où deux institutions ou plus sont situées dans la même ville ou cité, la disposition est alphabétique par noms d'hôpitaux.

Les institutions situées dans des zones suburbaines sont inscrites suivant le nom du centre métropolitain avoisnant.

Information—Renseignements

The information on each institution, or so much of it as is available, is reported in the following sequence: the name (in bold face type); the street or postal address; the ownership, type of operation or license, and year of establishment (in parenthesis); the number and types of beds and bassinets set up for use; statistics on admissions, births and approximate operating budget; the number of personnel employed including undergraduates; and the names and titles of administrative and chief departmental personnel.

The data on admissions, births, budget and personnel are not intended for accounting or statistical purposes but only as general information to indicate the activity of individual institutions. In many cases therefore these figures are approximations based on the latest data available, usually for the institution's last fiscal year ending prior to the date of publication.

Les renseignements relatifs à chaque institution, ou la part de renseignements disponibles, sont rapportés dans l'ordre suivant: nom (en caractères gras); rue ou adresse postale; propriétaire de l'institution, statut, et année de fondation (entre parenthèses); le nombre et genre de lits et de berceaux dressés; statistiques ayant rapport aux admissions, aux naissances et au budget approximatif de gestion; nombre du personnel employé y compris les non-diplomés; noms et titres du personnel administratif et du personnel dirigeant des départements.

Les informations ayant rapport aux admissions, naissances, budget et personnel ne sont pas destinées à des fins de comptabilité ou de statistiques mais constituent des renseignements généraux indiquant des activités de chaque institution. Par conséquent, dans bien des cas ces chiffres, fondés sur les dernières informations disponibles, sont approximatifs et se rapportent, pour chaque institution, à la dernière année fiscale se terminant avant la date de publication.

Abbreviations—Abbréviations

In most instances the meaning of abbreviations used will be apparent without reference to a key. However, the principle abbreviations used for both English and French words are indicated on the following page. Both the English and French words are indicated where the same abbreviation is used for each. Where abbreviations are used for words in only one language, the equivalent word in the other language is indicated in parenthesis.

Dans la plupart des cas la signification des abbréviations employées est claire sans qu'il y ait besoin de se référer à une clef. Cependant, les abbréviations principales indiquant à la fois des mots anglais ou français figurent à la page suivante. Dans les cas où la même abbréviation sert à désigner, à la fois un mot anglais et français, ces derniers sont indiqués. Dans le cas où les abbréviations se réfèrent à des mots dans une langue seulement, le mot correspond de l'autre langue est indiqué entre parenthèses.

Abbreviations . . .

Type of Service and Number of Beds—Genre de service et nombre de lits

The number of beds set up for use is indicated in the list following the abbreviated description of the type of medical service for which such beds are utilized.

Le nombre des lits dressés est indiqué sur la liste qui fait suite à la description abrégée du genre de service médical auquel ces lits sont destinés.

General—Beds utilized for the treatment of a wide range of conditions (excluding bassinets for infants born in hospital).	**Gen**	**Gén**	Général—Lits employés pour le traitement d'une grande variété d'affections (excluant les berceaux pour nouveaux-nés nés à hôpital).
Paediatric—Beds in general hospitals which admit children only.	**Paed**	**Péd**	Pédiatrie—Lits dans les hôpitaux généraux qui n'admettent que les enfants.
Maternity—Beds in instiutions providing obstetrical service only.	**Mat**		Maternité—Lits dans les institutions qui ne fournissent que le service obstétrique.
Bassinets—Bassinets for newborn infants, born in the hospital.	**Bas**	**Berc**	Berceaux—Berceaux pour nouveaux-nés, nés à l'hôpital.

Beds in special hospitals for the treatment of particular conditions, and similar beds in special units or annexes of general or other hospitals, are designated by the following types of service:

Les lits dans les hôpitaux spéciaux pour le traitement d'affections particulières, et les lits semblables dans des formations spéciales ou annexes d'un hôpital général ou de tout autre hôpital sont désignés par les genres de services suivants:

Alcoholic	**Alcoh**	Alcoolique
Chronic	**Chron**	Chronique
Contagious	**Cont**	Contagieux
Convalescent	**Conv**	Convalescent
Epileptic	**Epil**	Epileptique
Mental	**Ment**	Mental
Orphelinat	**Orp**	Orphelinat
Orthopaedic	**Orth**	Orthopédique
Tuberculosis	**TB**	Tuberculose
Infirm—Beds utilized for patients requiring less intensive medical care, in infirmaries, nursing homes, homes for the aged, et cetera.	**Inf**	Infirme—Lits employés pour des patients nécessitant des soins médicaux moins intenses, dans les infirmeries, les maisons de convalescence ou de repos, les maisons pour les vieillards, etc.
Total—Where more than one type of service is shown for an institution the total number of beds for adults and children (excluding newborn infants) is indicated.	**Tot**	Total—Lorsque plus d'un genre de service est indiqué pour une institution le nombre total de lits pour adultes et enfants (excluant les nouveaux-nés) est indiqué.

Positions and Titles—Postes et titres officiels

Acct — Accountant (Comptable)

Department of National Defence, Army	**—Army**	Ministère de la défence nationale, Armée
Department of National Defence, Air Force	**—RCAF**	Ministère de la défence nationale, Aviation
Voluntary lay corporation	**L**	Société bénévole laïque
Municipal	**M**	Municipale
Provincial Government	**PG**	Gouvernement provincial
Roman Catholic	**RC**	Catholique
Salvation Army	**SA**	Armée du Salut
United Church of Canada	**UC**	Eglise Unie du Canada

Operation or License—Statut

The following definitions were adopted by the 1951 Dominion-Provincial Conference on Hospital Statistics.

Les définitions suivantes ont été adoptees par la Conférence Fédérale—Provinciale des Statistiques Hospitalières de 1951.

Public Hospital—is one which is not operated for profit, accepts all patients regardless of their ability to pay, and is recognized as a public hospital by the province in which it is located. This includes public nursing homes, public outpost hospitals and public Red Cross hospitals. **Pub**

Hôpital public—Hôpital dont l'exploitation n'est pas à but lucratif, qui accepte tous les malades quels que soient leurs moyens et qui est reconnu comme hôpital public par la province où il est situé. (Y compris les maisons publiques de convalescence ou de repos, les hôpitauv publics des régions reculées et les hôpitaux publics de la Croix-rouge.)

Private Hospital—is one which ordinarily restricts its admissions to patients paying for the care provided, at rates determined by the Management. This includes private nursing homes. **Priv**

Where the institution is owned by an individual or partnership the term "private" is deemed to designate both the type of operation or license and the ownership.

Hôpital privé—N'admet ordinairement que les malades qui payent les soins reçus aux taux fixés par la direction. (Y compris les maisons de convalescence et de repos privées.)

Lorsque l'institution est la propriété d'un individu ou de plusieurs individus associés, on acceptera le terme "privé" comme servant à indiquer à la fois le statut et la propriété.

Statistics—Statistiques

Admissions—A hospital in-patient admission is defined as the formal acceptance and reception of a person as an in-patient. Reception involves the allocation of a regular hospital bed, cot, or bassinet. **Adm**

Admissions—L'admission d'un malade hospitalisé consiste à admettre et à recevoir une personne de façon régulière, comme malade hospitalisé. La réception suppose qu'un lit ou un berceau ordinaire de l'hôpital sera attribué au malade.

Births—A newborn is defined as an infant newly born in the hospital who receives newborn care only. **Bir**

Nais Naissances—Le nouveau-né est l'enfant nouvellement né à l'hôpital et qui ne reçoit que les soins propres aux nouveau-nés.

Budget—Approximate annual cost of operating the institution, based on the latest figures available. **Budg**

Budget—Coût annuel approximatif de gestion de l'institution basé sur les chiffres disponibles les plus récents.

Personnel—Number of paid personnel, members of religious orders working as staff members, and undergraduate nurses, doctors, et cetera. **Pers**

Personnel—Nombre du personnel salarié, religieuses travaillant comme membres du personnel, et infirmières élèves, médecins internes, et cetera.

Life-Long FURNITURE is DURABLE and BEAUTIFUL

THIS cheerful, home-like private room group illustrates the simplicity of design that makes this furniture line so popular with hospitals and institutions everywhere. The electrically welded steel construction, and infra-red baked, multiple coat enamel finish ensures unusual durability . . . and lasting beauty that is wearproof and fireproof. Many ingenious sound-deadening devices eliminate all metallic harshness, ensure the quiet and peaceful environment so necessary for successful rest-therapy. Available in rich wood finishes and harmonious color schemes to suit any decor. Over two hundred items for varied budgets.

Write today for our catalogue No. 76, "Guide to Selection of Hospital Furniture".

Continental Surgical

130 McCAUL ST. TORONTO,

FIRST . . . . .

. . . and STILL FOREMOST!

The new Continentalair M-4000 iceless oxygen tent is so simple in design, and so sturdy in construction that adjustments or repairs are practically eliminated. The air conditioning power plant is hermetically sealed, requires no inspection or maintenance, and its functions are so well balanced that we dare guarantee its performance for a *full five years.* The new one-piece, cast aluminum, centrifugal cooling chamber with integral water trap . . . *and all moving parts* are rust-proof, and resistant to corrosion and oxidation. Refrigerant tubes positively cannot leak. This new Continentalair, manufactured by the company which introduced the first iceless oxygen tent, offers genuine push button control . . . fully automatic operation . . . provides high oxygen concentration in seconds . . . reduces temperature 25 degrees in minutes . . . maintains desired temperature within one degree . . . filters air automatically.

Descriptive folder on request.

Since this is the most dependable unit ever built, we also provide an additional guarantee of one year for direct factory service.

Cut down on Breakage

DIXIE CUPS

Some operators report almost 100% breakage of glassware monthly . . . Others say they re-order a complete new set of china cups every other month. That's a lot of breakage! And a lot of extra overhead to pile on today's already soaring operating costs.

Genuine Dixie Cups and Food containers are one sure way to cut down on this expensive breakage. Used but once, Dixie Cups never have to be washed, sterilized, stacked or sorted, greatly reduce breakage costs . . . as well as save on dishwasher's wages . . . hot water, soaps and detergents.

Try Dixie Cups for your food service and watch how you save!

DIXIE CUPS . . . the paper cups everybody knows by name

What the Doctors Ordered!

● Wakefield, and a wide rural area in the lower Gatineau hills, is well served by the Gatineau Memorial Hospital.

It needed, however, a building and equipment fund of not less than $85,000.

A planned campaign, utilizing **JPJ(C) Special service for smaller institutions** resulted in subscriptions of $100,000. This is what the Drs. Geggie, father and son, have to say of this service:

> *"We have been complimented many times on the conduct of our campaign, and asked how we did it . . . We could not have handled it without you.*
>
> *"All in all . . . A great success due in no small part to your organization. Many complimented us on major pamphlet and mass distribution piece."*

Gatineau is one of our over-the-top campaigns for a small objective of which we are proud as of the $16,400,000 (nearly 2½ million oversubscribed) raised for the Toronto General.

SMALL OR LARGE your institution's needs are within range of our interest and experience.

For information on our fund raising services, particularly in consultation, write to

Educational Programs for Hospital Personnel

Administrators

Each year, for the past ten to 15 years, short refresher courses or institutes have been held for administrators, department heads and trustees in the various provinces. In some cases, these cover general administrative problems; in others the subject matter is specific, e.g., accounting, laundry management, or medical records. Of these short study periods, the longest established course is the Western Canada Institute for Hospital Administrators and Trustees which is held annually and rotates among the four western provinces

Formal courses of training for administrators in Canada are as outlined below.

University of Toronto

The Department of Hospital Administration, School of Hygiene, University of Toronto, offers a 21 months' course for university graduates in arts, medicine or the sciences, who have acceptable academic standing, experience, and aptitude. The program includes nine months' academic study on the campus and in nearby general and special hospitals, followed by a one-year supervised hospital residency in an acceptable hospital in Canada or the United States. A thesis on a selected subject is required to complete the second year's work. The course leads to the Diploma in Hospital Administration (Toronto), which is equivalent to the Master's degree, and is under the direction of Dr. Harvey Agnew, Professor of Hospital Administration.

University of British Columbia

The School of Commerce at the University of British Columbia, in co-operation with the Vancouver General Hospital, offers an undergraduate course in hospital administration as an option for specialization. The 6½ years' course includes seven months' instruction and apprenticeship at a selected hospital and, as well, a final ten months' residency in a hospital. During this latter period the student is required to submit a graduating essay based upon independent investigation. Upon satisfactory completion, the student receives a bachelor of commerce degree and a diploma in hospital administration.

Comité des Hôpitaux du Québec

Under the auspices of the Comité des Hôpitaux du Québec, with headquarters in Montreal, a program designed to provide formal training for administrators is conducted in the French language. Each year a concentrated two-week study session is held for new students and a second session for advanced students, with the result that many of the original class have completed 10 weeks of formal training. Throughout the year several one-week sessions, dealing with specific departments, are held and also two-week courses for directors of nursing schools. This program is a very important development in that it is really a form of undergraduate training designed to pave the way for the establishment of a post-graduate program in the French language. Director of the course is Rev. Father H. L. Bertrand, S.J., 325 St. Catherine Rd. E., Outremont, Montreal 8, P.Q.

C.H.C. Extension Course in Hospital Organization and Management

The extension course offered by the Canadian Hospital Council is designed to assist people already employed in the hospital field. It is of two years' duration, each year consisting of a winter session conducted on a home-study basis and a summer class-room session of four weeks. Lessons for the winter sessions are supervised by the faculty of the Department of Hospital Administration, University of Toronto, and reviewed by one or more leading administrators before presentation to students. Faculty for the summer sessions are likewise authorities in the hospital and health field. Students who complete the course successfully are awarded a certificate by the Canadian Hospital Council.

* * * * *

Dietitians

The academic qualification for dietitians is a degree in Household Science or Home Economics with major credit in Foods and Nutrition. Canadian universities conferring such degrees are:

University of British Columbia, Vancouver, B. C. Apply to: Charlotte S. Black, Director, School of Home Economics.

University of Alberta, Edmonton, Alta. Apply to: Mabel Patrick, Professor, Household Economics.

University of Saskatchewan, Saskatoon, Sask. Apply to: Dr. Hope Hunt, Dean, College of Household Science.

University of Manitoba, Winnipeg, Man. Apply to: Dr. A. Isabel MacArthur, Director, School of Home Economics.

University of Western Ontario, London, Ont. Apply to: Sister M. Dominica, Brescia Hall.

Macdonald Institute, Ontario Agricultural College, Guelph, Ont. Apply to: Dr. Margaret S. McCready, Principal.

University of Toronto, Toronto, Ont. Apply to: Mrs. Jessie Roberts Current, Acting Head, Department of Household Science.

Macdonald College, McGill University, Macdonald College, P.Q. Apply to: Helen Neilson, Director, School of Household Science.

University of Montreal, Montreal, P.Q. Apply to: Rachel Beaudoin, Director, Institute of Dietetics and Nutrition.

Laval University, Quebec, P.Q. Apply to: Sister Ste. Therese-de-la-Foi, Director, School of Home Economics.

Mount Allison University, Sackville, N.B. Apply to: Doris Runciman, Professor of Home Economics.

Acadia University, Wolfville, N.S. Apply to: Elizabeth MacMillan, Dean, School of Home Economics.

Mount St. Bernard College, St. Francis Xavier University, Antigonish, N.S. Apply to: Sister St. Andrew, Director of Home Economics.

Mount St. Vincent College, Halifax, N.S. Apply to: Sister Irene Marie, Director of Home Economics.

Courses, in Canadian hospitals, approved for the training of dietetic interns by the Canadian Dietetic Association are:

Royal Jubilee Hospital, Victoria, B.C. Director of Dietetics, Christine Robertson.

Vancouver General Hospital, Vancouver, B.C. Director of Dietetics, Paula R. Reber.

University of Alberta Hospital, Edmonton, Alta. Director of Dietetics, Margaret G. Lang.

Hamilton General Hospital, Hamilton, Ont. Director of Dietetics, Marjorie A. Harris.

Hospital for Sick Children, Toronto, Ont. Supervisor of Food Service, M. Gladys Martin.

St. Michael's Hospital, Toronto, Ont. Director of Dietetics, Sister Mary Frederick.

Toronto General Hospital, Toronto, Ont. Director of Nutrition, Margaret Ketchen.

Toronto Western Hospital, Toronto, Ont. Director of Dietetics, Edith M. Wark.

Montreal General Hospital, Montreal, P.Q. Director of Dietetics, Doris Lockhart.

Royal Victoria Hospital, Montreal, P.Q. Director of Dietetics, Charlotte M. Large.

Halifax Infirmary, Halifax, N.S. Director of Dietetics, Sister Frances Eleanor.

Victoria General Hospital, Halifax, N.S. Director of Dietetics, Marion I. Brown.

The courses in Food Administration offered by the T. Eaton Co. Limited, Toronto, Ont., under the direction of Helen A. Buik, Supervisor of Restaurants, and the University of Alberta, Edmonton, Alta., under the direction of Mabel Patrick, Professor, Household Economics, are also approved by the Canadian Dietetic Association for the training of dietetic interns.

Applicants for approved internship or for membership in the Canadian Dietetic Association must meet certain requirements and each is assessed on her individual accomplishment.

Laboratory Technicians

The academic requirement necessary for entrance to an approved school for the training of laboratory technologists is Senior Matriculation or the equivalent educational standing in the various provinces. On completion of at least 12 months' training in an approved hospital training centre in the following subjects, bacteriology, biochemistry, histology, parasitology, serology, and haematology, candidates may sit for examinations which are set by the Canadian Society of Laboratory Technologists. A general certificate is then awarded to those candidates who successfully complete the examinations.

Applicants for a specialist certificate must hold a General Certificate and, in addition, have had at least two years' experience in the special field; or applicants must have senior matriculation with the necessary prerequisites as outlined above and, in addition, have had at least five years' experience in the special field; or applicants must hold degrees in biological sciences (accredited university) and, in addition, have had at least two years' experience in the special field (exclusive of undergraduate studies).

The Canadian Society of Laboratory Technologists* maintains a registry for technicians under agreement with the Canadian Medical Association. The Committee on Approval of Schools for Laboratory Technologists of the C.M.A. has approved the following hospital laboratories for the training of technologists, either in general or special courses, or in both. Details of individual courses of instruction may be obtained from the laboratory director of the school.

British Columbia

Victoria Veterans' Hospital, Victoria, B.C. Director of Laboratory, George Shanks, M.D. Course, General Certificate.

St. Joseph's Hospital, Victoria, B.C. Director of Laboratory, D. B. Roxburgh, M.D. Course, General Certificate.

Royal Jubilee Hospital, Victoria, B.C. Director of Laboratory, Ross McNeely, M.D. Course, General Certificate.

Shaughnessy Hospital, Vancouver, B.C. Director of Laboratory, J. C. Colbeck, M.D. Course, General Certificate.

St. Paul's Hospital, Vancouver, B.C. Director of Laboratory, H. H. Pitts, M.D. Course, General Certificate.

Vancouver General Hospital, Vancouver, B.C. Director of Laboratory, H. K. Fidler, M.D. Course, General Certificate.

Royal Columbian Hospital, New Westminster, B.C. Director of Laboratory, P. S. Rutherford, M.D. Course, General Certificate.

Provincial Mental Hospital, Essondale, B.C. Director of Laboratory, G. A. Nicholson, M. D. Course, General Certificate.

*The C.S.R.T. also maintains a placement bureau in order to assist both technicians seeking employment and hospitals seeking technicians for their laboratories. The Society's head office is situated at 294 Barton Street East, Hamilton, Ont.

Alberta

University of Alberta Hospital, Edmonton, Alta. Director of Laboratory, R. Edward Bell, M.D. Course: (1) General Certificate; (2) Specialties — bacteriology, haematology, biochemistry, endocrinology and metabolism, pathological histology.

Royal Alexandra Hospital, Edmonton, Alta. Director of Laboratory, M. J. Lynch, M.D. Course, General Certificate.

Edmonton General Hospital, Edmonton, Alta. Director of Laboratory, Samuel Hanson, M.D. Course, General Certificate.

Holy Cross Hospital, Calgary, Alta. Director of Laboratory, J. D. Duffin, M.D. Course, General Certificate.

Colonel Belcher Hospital, Calgary, Alta. Director of Laboratory, J. D. Duffin, M.D. Course, General Certificate.

Saskatchewan

Saskatoon City Hospital, Saskatoon, Sask. Director of Laboratory, J. W. Adams, M.D. Course, General Certificate.

St. Paul's Hospital, Saskatoon, Sask. Director of Laboratory, D. F. Moore, M.D. Course, General Certificate.

Moose Jaw General Hospital — Providence Hospital, Moose Jaw, Sask. Director of Laboratory, Geoffrey Kent, M.Sc., M.D. Course, General Certificate.

Regina Grey Nuns' Hospital, Regina, Sask. Director of Laboratory, Stewart Alexander, M.D. Course: (1) General Certificate; (2) Specialties — histology, haematology, bacteriology.

Regina General Hospital, Regina, Sask. Director of Laboratory, J. D. Stephen, M.D. Course: (1) General Certificate; (2) Specialties — histology, haematology, bacteriology.

Manitoba

St. Boniface Hospital, St. Boniface, Man. Director of Laboratory, James Prendergast, M.D. Course, General Certificate.

Misericordia General Hospital, Winnipeg, Man. Director of Laboratory, O. C. Trainor, M. D. Course, General Certificate.

Deer Lodge Hospital, Winnipeg, Man. Director of Laboratory, T. H. Williams, M.D. Course, General Certificate.

Winnipeg General Hospital, Winnipeg, Man. Director of Laboratory, Daniel Nicholson, M.D. Course, General Certificate.

Ontario

Grace Hospital, Windsor, Ont. Director of Laboratory, H. S. Asselstine, M.D. Course, General Certificate.

Stratford General Hospital, Stratford, Ont. Director of Laboratory, J. L. Penistan, M.D. Course, General Certificate.

St. Catharines General Hospital, St. Catharines, Ont. Director of Laboratory, Lorne Whitaker, M.D. Course, General Certificate.

St. Joseph's Hospital, Hamilton, Ont. Director of Laboratory, E. N. Ballantyne, M.D. Course, General Certificate.

Mountain Sanatorium, Hamilton, Ont. Director of Laboratory, A. R. Armstrong, M.D. Course: (1) General Certificate; (2) Specialty—bacteriology.

Hamilton General Hospital, Hamilton, Ont. Director of Laboratory, William J. Deadman, M.B. Course, General Certificate.

Oshawa General Hospital, Oshawa, Ont. Director of Laboratory, H. G. Pritzker, M.D. Course, General Certificate.

Wellesley Division of Toronto General Hospital, Toronto, Ont. Director of Laboratory, Harold Gold, M.D. Course, General Certificate.

Toronto General Hospital, Toronto, Ont. Director of Laboratory, William Robinson, M.B. Course, General Certificate.

Women's College Hospital, Toronto, Ont. Director of Laboratory, Alice W. Gray, M.D. Course, General Certificate.

Toronto East General Hospital, Toronto, Ont. Director of Laboratory, S. F. Penny, M.D. Course, General Certificate.

Toronto Western Hospital, Toronto, Ont. Director of Laboratory, Chester McLean, M.D. Course, General Certificate.

St. Michael's Hospital, Toronto, Ont. Director of Laboratory, Roderick C. Ross, M.D. Course: (1) General Certificate; (2) Specialties — bacteriology, histology, biochemistry.

St. Joseph's Hospital, Toronto, Ont. Director of Laboratory, L. S. Mautner, M.D. Course, General Certificate.

Sunnybrook Hospital, Toronto, Ont. Director of Laboratory, A. J. Blanchard, M.D. Course, General Certificate.

Mount Sinai Hospital, Toronto, Ont. Director of Laboratory, H. G. Pritzker, M.D. Course, General Certificate.

Victoria Hospital, London, Ont. Director of Laboratory, E. M. Watson, M.D. Course, General Certificate.

St. Joseph's Hospital, London, Ont. Director of Laboratory, F. W. Luney, M.D. Course, General Certificate.

Kitchener-Waterloo Hospital, Kitchener, Ont. Director of Laboratory, L. C. Fisher, M.D. Course, General Certificate.

Belleville General Hospital, Belleville, Ont. Director of Laboratory, H. H. Lucke, M.D. Course, General Certificate.

Brantford General Hospital, Brantford, Ont. Director of Laboratory, W. J. Holley, M.D. Course, General Certificate.

Kingston General Hospital, Kingston, Ont. Director of Laboratory, G. F. Kipkie, M.D. Course: (1) General Certificate; (2)Specialties — biochemistry, haematology.

Hotel Dieu Hospital, Kingston, Ont. Director of Laboratory, F. F. Howatt, M.D. Coure, General Certificate.

Ottawa General Hospital, Ottawa, Ont. Director of Laboratory, D. Magner, M.D. Course: (1) General Certificate; (2) Specialty — haematology.

Ottawa Civic Hospital, Ottawa, Ont. Director of Laboratory, Max O. Klotz, M.D. Course: (1) General Certificate; (2) Specialties — biochemistry, haematology, histology.

Quebec

Hôpital du Sacre Coeur, Cartierville, P.Q. Director of Laboratory, J. George Manseau, M.D. Course, General Certificate.

St. Jean de Dieu Hospital, Gamelin (Laval), P.Q. Director of Laboratory, P. E. Laurin, M.D. Course, General Certificate.

Hôtel-Dieu St. Vallier, Chicoutimi, P.Q. Director of Laboratory, Wilfrid Lachance, M.D. Course, General Certificate.

St. Vincent de Paul General Hospital, Sherbrooke, P.Q. Director of Laboratory, Jacques Olivier, M.D. Course, General Certificate.

Hôpital General de Verdun, Verdun, P.Q. Director of Laboratory, Roger Beaulieu, M.D. Course, General Certificate.

St. Mary's Hospital, Montreal, P.Q. Director of Laboratory, William Leach, M.D. Course, General Certificate.

Children's Memorial Hospital, Montreal, P.Q. Director of Laboratory, F. W. Wiglesworth, M.D. Course, General Certificate.

Hôpital Notre Dame, Montreal, P.Q. Director of Laboratory, Albert Bertrand, M.D. Course, General Certificate.

Jewish General Hospital, Montreal, P.Q. Director of Laboratory, M. A. Simon, M.D. Course, General Certificate.

Hôpital Sainte-Justine, Montreal, P.Q. Director of Laboratory, N. R. Bouziane, M.D. Course, General Certificate.

Hôpital Saint-Luc, Montreal, P.Q. Director of Laboratory, Paul Martin, M.D. Course, Specialist — bacteriology, serology.

Hôtel Dieu de Montreal, Montreal, P.Q. Director of Laboratory, Gaston Gosselin, M.D., F.C.I.C. Course, General Certificate.

Hôpital du Saint-Sacrement, Quebec, P.Q. Director of Laboratory, J. Edouard Morin, M.D., F.R.S.(C), F.R.C.P. (Can). Course, General Certificate.

Hôpital St. Francois d'Assise, Quebec, P.Q. Director of Laboratory, Hector Turcotte, M.D. Course, General Certificate.

Hôtel Dieu de Quebec, Quebec, P.Q. Director of Laboratory, Henri Marcoux, M.D. Course, (1) General Certificate; (2) Specialties—histology, haematology, bacteriology, pathological chemistry.

New Brunswick

Lancaster D.V.A. Hospital, Saint John, N.B. Director of Laboratory, Arnold Branch, M.D. Course, General Certificate.

Saint John General Hospital, Saint John, N.B. Director of Laboratory, R. A. H. Mackeen, M.D. Course, General Certificate.

Nova Scotia

St. Martha's Hospital, Antigonish, N.S. Director of Laboratory, O. C. MacIntosh, M.D. Course, General Certificate.

Halifax Infirmary, Halifax, N.S. Director of Laboratory, V. N. MacKay, M.D. Course, General Certificate.

Division of Laboratories, Pathological Institute, Halifax, N.S. Director of Laboratory, D. J. Mackenzie, M.D. Course: (1) General Certificate; (2) Specialties—bacteriology, haematology, pathological chemistry, and histology. (Instruction at Provincial Laboratory on work for Victoria General Hospital and a group of Halifax and Provincial Hospitals.)

Prince Edward Island

Provincial Sanatorium and Provincial Laboratories, Charlottetown, P.E.I. Director of Laboratory, J. H. Shaw, M.D. Course, General Certificate.

Medical Interns

The hospitals which are herein specified as "approved" provide their interns with clinical and other facilities, organization, and opportunities for study and experience which are outlined as assential in the "Basis of Approval for Internship of Hospitals in Canada," utilized by the Committee on Approval of Hospitals of The Canadian Medical Association. Graduates or final year students of unapproved or unrecognized medical schools are not accepted by these hospitals.

Because of the frequent desire of young graduates in both Canada and the United States to take internship in the other country, it has been arranged that this list of approved internships and that of the Council on Medical Education and Hospitals of the American Medical Association be reciprocally approved. Arrangements have been made also whereby credit for an internship in an approved Canadian hospital will be given by the National Board of Medical Examiners, many State licensing bodies, and the Specialty Boards in the United States.

It should be noted that the inclusion of a hospital on the "approved" list refers to the basic training as provided in a general internship. Its relationship to training for the practice of the specialties is that the Royal College of Physicians and Surgeons of Canada recognizes the basic training provided in "approved" hospitals as the common and fundamental background for doctors who may undertake further training leading to certification in one of the recognized specialties. The Royal College of Physician and Surgeons of Canada has elaborated standards of approval of hospitals for advanced graduate training in the specialties and a list of such approved Canadian hospitals may be obtained from the Royal College.

As there are a number of good hospitals in Canada which can provide their interns with an excellent training but which, for one reason or another, do not fully comply with the provisions of the "Basis of Approval", the Committee has placed these hospitals upon a "commended" list.

Further information with respect to the Basis of Approval may be obtained by writing to the Canadian Medical Association, 135 St. Clair Avenue West, Toronto 5.

Additional information concerning "approved" hospitals may be found in the list of hospitals, pages 40 to 75.

Footnotes.

1 — In the medical colleges at Dalhousie, Laval, Montreal, Manitoba and Ottawa, the final year is largely an internship year, and students are appointed by their Deans to internship by arrangement with the hospital as undergraduate interns. At McGill, Queen's, Toronto, Western Ontario and Alberta, the degree in medicine is awarded at the end of the fourth medical year and graduates are free to select their own internship. The Canadian Intern Placement Service, an activity of the Canadian Association of Medical Students and Interns, is utilized by the graduating classes of these five schools in obtaining appointments to first internship.

2 — r — Rotation; s — Straight.

3 — Autopsy Classification: A — 60% or higher; B — 59% to 40%; C — 39% to 25%; D — under 25%.

Hospitals Approved for Internship (Medical)

Nursing Personnel

Registered Nurses' Acts are in force in all provinces with the exception of Quebec and Prince Edward Island, which have licensing Acts, and Newfoundland whose Act has not yet been passed by the legislature. Reciprocity is in effect between all provinces, providing that the requirements of the provincial acts are met, i.e., academic and professional. This holds also for nurses from the United Kingdom, United States of America, and other countries. One of the great difficulties encountered in reciprocal registration appears to be that of inability to meet the professional education standards of the provinces, e.g., training in hospitals with too few beds, and lack of experience in obstetrical and paediatric nursing.

The term "Nurse" is now being applied to several categories of persons who care for the sick:

1. Registered Nurse. A nurse who has successfully completed a professional nursing course in an approved school of nursing and, after writing the registered nurses' examinations, is currently registered in one of the provinces.

2. Non-Registered Nurse. A nurse who has completed a professional nursing course and who is awaiting registration or the results of registered nurse examinations, or is ineligible for registration in the province in which she resides.

3. Psychiatric Nurse. One who has completed a course of two to three years in a mental hospital and is prepared to nurse psychiatric patients. (British Columbia has legislation covering licensing.)

4. Practical Nurse. (a) one who has completed a course for nursing auxiliary workers, as in British Columbia, Manitoba, or New Brunswick (see 5); or (b) one who without formal training but through aptitude or need is caring for the sick.

5. Nursing Assistant (nursing aide, nurses' aide, practical nurse). Persons who have completed a course for auxiliary nursing workers or the equivalent. These are either licensed or certified.

6. Ward Aide (Ward Maid). Untrained workers who carry out non-nursing and/or housekeeping duties on a hospital ward.

Auxiliary Nursing Workers

Eight of the ten provinces have some type of school for nursing auxiliaries. Although the Canadian Nurses' Association has favoured the title "nursing assistant", there is variation in the terms used. In general the registered nurses' associations have some jurisdiction over the schools, having a representative on the advisory board or its equivalent.

Licensing legislation for nursing auxiliaries is in effect in Alberta and Manitoba and has been passed in Prince Edward Island though not yet in effect there. Provinces having legislation do accept nursing auxiliaries trained elsewhere, upon production of the necessary credentials. The uniform worn by these workers is different in each province but in all cases distinctive from that of the registered professional nurse. Schools for the training of auxiliary nursing workers are:

British Columbia

Vancouver — Practical Nurse Course, Vancouver Vocational Institute.

Alberta

Calgary — School for Nursing Aides, 1315-16th Avenue, Northwest. Registrar Consultant: Miss Frances Ferguson.

Saskatchewan

Saskatoon — School for Nursing Assistants, Canadian Vocational Training School, 33rd St. Principal: E. A. Davies. Duration of course: 9 mths.

Manitoba

Portage la Prairie — Training School for Practical Nurses,* Portage School for Mentally Defective Persons.

Selkirk — Training School for Practical Nurses*, Selkirk Hospital for Mental Diseases.

St. Boniface — St. Boniface School for Practical Nurses, 171 Despins St.

Winnipeg — The Central School for Practical Nurses, Manitoba Technical Institute, Portage Ave., at Wall St.

Ontario

The Ontario Department of Public Health conducts 9-month courses for the training of certified nursing assistants at hospitals located in Toronto, Kingston, and Fort William. Two schools are operated independently at hospitals located in Picton and Brockville; but students try the examinations set by the Ontario Department of Public Health.

Quebec

Bordeaux — L'Ecole d'Aides-Malades, Hôpital Ste-Joseph des Convalescents. Director: Sr M. Emerentienne.

Montreal — Montreal School for Nursing Aides, sponsored by The Association of Nurses of the Province of Quebec and Hospital Councils, at the Reddy Memorial Hospital. Director: Mrs L. H. Fisher.

Verdun — Verdun Protestant Hospital (Psychiatric — 12 mths.)

New Brunswick

Moncton — School for Practical Nurses, Provincial Technical Institute, Collishaw Street.

Nova Scotia

Dartmouth — Nova Scotia Hospital (Psychiatric — 9 mths.)

Kentville — Nova Scotia Sanatorium (Tuberculosis — 9 mths.)

---

* Graduates from these institutions possess a diploma in psychiatric nursing and, in addition to their psychiatric training, have had an affiliation with a general hospital in order to qualify for licensure as practical nurses in the Province of Manitoba.

The Department of Veterans' Affairs operates schools at Sunnybrook Hospital, Toronto, Ont; Queen Mary Veterans' Hospital, Montreal, P.Q.; and at Camphill Hospital, Halifax, N.S. The courses are of 9 months' duration and students take the examinations set for certification in the respective provinces. Both male and female students accepted.

Male Nurses

The following hospital schools of nursing accept male students for general training:

British Columbia

Vancouver — St. Paul's

Alberta

Calgary — Holy Cross
Edmonton — General; and University of Alberta

Saskatchewan

Humboldt — St. Elizabeth's
Moose Jaw — Moose Jaw General; and Providence
Prince Albert — Holy Family; and Victoria Municipal
Regina — General; and Grey Nuns'
Saskatoon — Saskatoon City; and St. Paul's
Yorkton — Yorkton General

Manitoba

Winnipeg — General

Ontario

Kingston — Ontario Hospital
London — Ontario Hospital
Port Arthur — St. Joseph's
Whitby — Ontario Hospital

Nova Scotia

Antigonish — St. Martha's
Dartmouth — Nova Scotia Hospital
Glace Bay — St. Joseph's; and Glace Bay General
Halifax — Victoria General
New Glasgow — Aberdeen
Sydney — City of Sydney
Yarmouth — General

The following hospitals accept male students for psychiatric training. They are not eligible for registration.

British Columbia

Essondale — Provincial Mental Hospital

Alberta

Ponoka — Provincial Mental Hospital

Manitoba

Brandon — Hospital for Mental Diseases
Portage la Prairie — School for Mentally Defective Persons
Selkirk — Hospital for Mental Diseases

Quebec

In the province of Quebec no male nurses are accepted under the present law. The following schools accept male students for general training but graduate them as orderlies:
Chicoutimi — Hôtel Dieu
Levis — Hôtel Dieu
Mastai — Hôpital St-Michel-Archange
Montreal —Hôpital de la Merci (for religious only)
Quebec City — Hôtel-Dieu

The only hospital in Quebec which accepts male students for psychiatric training is the Verdun Protestant Hospital, Verdun.

Pharmacists

For entrance to any of the Canadian Schools of Pharmacy a student must have obtained senior matriculation or four years of high school standing plus first year university in arts and sciences. Two schools offer a course in hospital pharmacy or hospital pharmacy administration — College of Pharmacy, University of Saskatchewan, and the Ontario College of Pharmacy. The Canadian Schools of Pharmacy are as follows.

University of British Columbia, Faculty of Pharmacy, Vancouver, B.C. Director: Dean A. W. Matthews. No. of graduates yearly: 40.

University of Alberta, School of Pharmacy, Edmonton, Alta. Director: Dr. M. J. Huston. No. of graduates yearly: 30.

University of Saskatchewan, College of Pharmacy, Saskatoon, Sask. Director: Dean W. C. MacAuley. No. of graduates yearly: 35.

University of Manitoba, School of Pharmacy, Winnipeg, Man. Director: Professor D. McDougall. No. of graduates yearly: 30.

Ontario College of Pharmacy, 46 Gerrard St. E., Toronto. Director: Dean F. N. Hughes. No. of graduates yearly 125.

University of Montreal, Faculty of Pharmacy, Montreal, P.Q. Director: Dean A. F. Larose. No. of graduates yearly: 70.

Laval University, School of Pharmacy, Quebec, P.Q. Director: Professor J. A. Marquis. No. of graduates yearly: 20.

Maritime College of Pharmacy, Halifax, N.S. Director: Dean J. E. Cooke. No. of graduates yearly: 20.

* * * *

Physical and Occupational Therapists

Courses in physical and occupational therapy are given in two Canadian Universities, administered in each case by the faculty of medicine. There are no longer any schools giving training in either physical or occupational therapy alone in Canada. Graduates of the present combined three-year diploma courses are qualified to practise both physical and occupational therapy. The Canadian Association of Occupational Therapy maintains a registry of qualified occupational therapists at 331 Bloor St. W., Toronto. The Canadian Physiotherapy Association, 10 Bedford Rd., Toronto, maintains a national registry for physiotherapists who are graduates of university courses, or the equivalent, in physiotherapy. Physiotherapists whose qualifications do not meet the standards set by the Canadian Physiotherapy Association are generally registered and licensed to practise by the province in which they are working.

The approved schools of physical and occupational therapy are:

University of Toronto, Division of Physical and Occupational Therapy, 6 Devonshire Place, Toronto. Director: A. N. Zinovieff, M.R.C.S., L.R.C.P. (London), Dr Phys. Med. (London). Entrance requirements, Grade XIII. Student capacity per year — 115.

McGill University, School of Physical and Occupational Therapy, 1266 Pine Avenue W., Montreal, P.Q. Director: Guy Fiske, M.D., C.M., D.T.M. & H. (Eng.). Entrance requirements, Grade XII and one year university in pre-physical and occupation therapy, or Grade XIII. Student capacity per year— 40.

Foreign-trained physiotherapists: Reciprocal registration agreements exist between the C.P.A. and the C.S.P. of Great Britain; the physiotherapists board of New Zealand; and graduates holding the diploma in physiotherapy from the University of Australia. All other foreign-trained physiotherapists are accepted through membership examinations, if their course of training meets the standard set by the C.P.A.

* * * *

Radiological Technicians

The minimum academic qualifications, set by the Canadian Society of Radiological Technicians and which apply to all students planning to study radiography in Canada, are Junior Matriculation or University Entrance including one year of High School Physics. The course consists of two years' training under a radiologist certified by the Royal College of Physicians and Surgeons or a diplomate of the American Board of Radiology. A list of "approved" training schools for radiological technicians, in Canada, is not available at present but information concerning courses within a province may be obtained from the Director representing that province on the C.S.R.T. Board of Directors or the Secretary of the local Member-Society (see Associations, page 103).

Directors representing the provinces are as follows:

British Columbia — Q. W. Stirling, R.T., 297 West 46th Ave., Vancouver.

Alberta — S. R. Hendra, R.T., 601 McLeod Bldg., Edmonton.

Saskatchewan — P. E. Hunt, R.T., 2058 McTavish St., Regina.

Manitoba — Mrs M. Stewart, R.N., R. T., Winnipeg General Hospital, Winnipeg.

Ontario — J. Collins, R.T., Plant 2, McKinnon Industries Ltd., St. Catharines.

Quebec — Miss Donalda Campbell, R.T., Apt. 43, 2287 Old Orchard St., Montreal.

New Brunswick — D. L. Liston, R.T., Lancaster Hospital Saint John.

Nova Scotia — A. Perry, R.T., Dawson Memorial Hospital, Bridgewater.

Record Librarians

The Canadian Association of Medical Record Librarians approves six schools for medical record librarians. All of these offer 12-month courses and the entrance requirement is senior matriculation. Because of the scarcity of registered record librarians in Canada, the Association does not maintain a registry and most requests for librarians go directly to directors of the schools. These schools are:

Manitoba

St. Boniface Hospital, St. Boniface, Man. Director: Sister Marie St. Pierre, R.R.L. Student capacity: 3.

Ontario

St. Michael's Hospital, Toronto, Ont. Director: Sister Mary Paul, R.R.L. Student capacity: 15.

St. Joseph's Hospital, Peterborough, Ont. Director: Sister M. Celine, R.R.L. Student capacity: 4.

Hotel Dieu Hospital, Kingston, Ont. Director: Sister M. Gordon, R.R.L. Student capacity: 4.

Quebec

Hotel Dieu Hospital, Montreal, P.Q. Director: Sister St. John-of-the-Cenacle, R.R.L. Student capacity: 12.

Nova Scotia

C.H.C. Extension Course in Medical Records

The Canadian Association of Medical Record Librarians and the Canadian Hospital Council have announced an extension course for the training of personnel engaged in medical records work, commencing in the fall of 1953. The course is of two years' duration. Each year will consist of two stages, a "home-study" and an "intramural" session. The "intramural" session consists of one month's training in a medical record department of a hospital approved for this type of instruction. These hospitals will be located in both eastern and western Canada. Upon satisfactory completion of the course, the student will receive a certificate from the Canadian Association of Medical Record Librarians. A preliminary certificate will be awarded by the association at the end of the first year. Neither certificate is to be confused with the certificate of registration (R.R.L.) now granted by the Canadian Association of Medical Record Librarians for the one-year academic course.

Social Workers

There are 8 schools of social work in Canada and all require students to have a B.A. or equivalent degree for entrance. The schools are as follows:

University of British Columbia, School of Social Work, Vancouver. Director: Miss Marjorie J. Smith. Approx. student capacity: 124. Teaches medical social work.

University of Manitoba, School of Social Work, Winnipeg. Director: Clarence E. Smith. Approx. student capacity: 33.

University of Toronto, School of Social Work, Toronto, Ont. Director: Charles E. Hendry. Approx. student capacity: 148. Teaches medical social work.

University of Ottawa, St. Patrick's College, School of Social Work, Ottawa. Director: Rev. Swithun Bowers. Approx. student capacity: 30.

University of McGill, School of Social Work, Montreal. Director: Dr. John O. Moore. Approx. student capacity: 76. Teaches medical social work.

University of Montreal, School of Social Work, Montreal, P.Q. Director: Rev. André M. Guillemette. Approx. student capacity: 38.

Laval University, School of Social Work, Quebec, P.Q. Director: Rev. G. Poulin. Approx. student capacity: 38.

University of King's College, Maritime School of Social Work, Halifax, N.S. Director: Lawrence T. Hancock. Approx. student capacity: 22. ●

for greater caloric infusion...

prescribe

10% Travert® SOLUTIONS
(INVERT SUGAR)

twice the calories of 5% Dextrose
in equal infusion time
with no increase in fluid volume or vein damage

With ***10% Travert*** solutions, a patient's carbohydrate needs can be more nearly satisfied.

Travert solutions are sterile, crystal clear, colorless, non-pyrogenic and non-antigenic. They are prepared by the hydrolysis of cane sugar and are composed of equal parts of D-glucose (dextrose) and D-fructose (levulose).

Nine ***Travert*** solutions enable the physician to correct electrolyte imbalances, acidosis and alkalosis, as well as supply twice the calories of 5% dextrose.

"A NAME WELL WORTH REMEMBERING"

PERHAPS not right at this very moment, but one of these days you may be considering the installation of modern Food Processing equipment as a *means of saving time, labor, money*—thus cutting operating costs.

When that time comes, and it may be sooner than you now think, it's only good business to look around—to select not only a fine product, but what is more important, to choose one backed by a *Company, with a reputation for dependable service and fair dealing.*

An outstanding and unusual example of such a highly respected Product and Company, is the name BERKEL—pioneer in the Slicing Machine field, and now offering a Complete Line of Food Processing Equipment.

Yes, for *real* satisfaction—*to get the most for your buying dollar*—the name BERKEL is truly "well worth remembering"—popular choice of leaders in the field for over half-a-century.

REPRESENTATIVES EVERYWHERE!

Castle

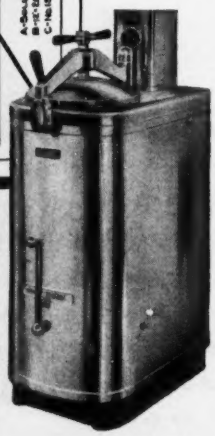
SUB-STERILIZER ROOM PLANNING

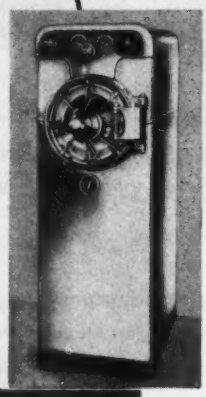
in its advanced concept, now incorporates two important provisions that mean—

1 **unauthorized traffic being diverted from the surgery.**

2 **minimal sterilizing facilities, adequate for all routine and emergency needs.**

We at Castle believe that every hospital administrator, operating room supervisor and hospital architect will be vitally interested in this modern approach to sub-sterilizer room planning. Note the specimen blueprint of one of the world's most publicized institutions . . . Castle equipped!





STERILIZERS LIMITED TO ONLY 3 ESSENTIAL UNITS

● **Pressure Instrument Washer Sterilizer**

Washes instruments more thoroughly — faster. *Sterilizes* and *dries* instruments for immediate use or storage . . . all in a single operation within 10-12 minutes.

● **Hi-Speed Emergency Sterilizer**

For routine sterilization or fast emergency service as the name implies. Soiled or contaminated instrument can be made bacteriologically safe in 5 minutes.

● **Warming Cabinet**

Precision built for temperature control of flasked sterile water, parenteral solutions, blankets and other supplies normally sterilized in the Central Sterile Supply.

with L.A. Hospital Pipeline Equipment

Oxygen is always immediately available when it's needed with a hospital pipeline system. L.A. station outlets provide exactly the oxygen service required in any part of the hospital.

Pipeline systems are more economical and more efficient than other distribution methods for the hospital and are less disturbing to the patient. Handling costs, as well as the loss of time and effort in moving cylinders from place to place in the hospital, are eliminated. Patients are no longer upset by the sight of oxygen cylinders when gas is supplied through a wall outlet in the same manner as water or gas in the patient's own home.

Liquid Air has designed a complete line of hospital pipeline outlet equipment to suit any hospital requirement and to meet all distribution and therapy contingencies.

For expert technical opinion on how a gas distribution system can benefit your hospital, follow the example of over 75% of the "piped" hospitals in Canada and contact Liquid Air through any of our Branches.

Foundations

Banting Research Foundation, Medical Office, University of Toronto, Toronto, Ont.; Chairman, A. N. Mitchell; Hon. Secretaries, Prof. A. W. Ham, Prof. J. K. W. Ferguson.

Rockefeller Foundation, 49 West 49th St., New York 20, N.Y., U.S.A. Canadian activities include appropriations to various Canadian universities, institutions, and organizations for research in certain limited fields in the natural and social sciences, in the humanities, and in medicine and public health, and the financing of post-doctoral fellowships to individual Canadians for work in fields related to the Foundation's general program. Under the Public Health Program aid is given for teaching in public health and nursing.

R. Samuel McLaughlin Foundation, 217 Bay St., Toronto 1, Ont.; Trustees, R. S. McLaughlin, Oshawa, Ont.; J. C. Fraser, Cedar Ridge, Scarborough, Ont.; Dr. W. E. Gallie, Toronto, Ont. Incorporated in 1951 under Letters Patent, Province of Ontario, for the promotion of the health and welfare of the Canadian people by (1) improvement in the education and training of the teaching staffs of the medical schools and their associated hospitals throughout Canada, and (2) the encouragement and support of medical research in these institutions.

W. K. Kellogg Foundation, 250 Champion St., Battle Creek, Mich., U.S.A., President and General Director. Dr. Emory W. Morris; Director, Division of Hospitals, Andrew Pattullo. The purpose of the Foundation is "to receive and administer funds for the promotion of the health, education and welfare of mankind . . ." In Canada the Foundation is assisting various universities in developing graduate and post-graduate educational programs for practicing physicians and dentists. It is also assisting in developing an accrediting program for dental schools and in establishing the first Canadian university course for the training of dental hygienists. Assistance is also being provided for the improvement of basic nursing education, the establishment of university courses for the training of hospital administrators, the development of on-the-job training programs for hospital administrators and allied personnel, and in-service educational opportunities for school administrators.

PREFERRED...

for use in Canadian hospitals!

Kalyx cold drink cups are used in many Canadian hospitals where a sanitary, easily-disposable drinking cup is needed for morning fruit-drinks or evening relaxants. Kalyx cups are handy . . . easily stored in large quantities. They're economical too. Their construction is sturdily dependable. Order from your wholesale dealer or contact Globe Envelopes Limited.

FIVE WAYS THAT *Sonograph Tape-Riter* CAN PAY FOR ITSELF MANY TIMES OVER IN YOUR HOSPITAL

1. **X-RAY DEPT.**—The generally accepted superiority of magnetic recording is particularly important in the interpretation and diagnoses of X-Ray plates.

2. **PATHOLOGICAL LABORATORIES**—The demonstrably higher sensitivity of tape recording plus complete absence of background noise (inherent in needle-cutting recorders) indicates Tape-Riter as the logical choice for pathological records.

3. **AUTOPSY ROOMS**—Special microphones and dual purpose foot-switches provide complete remote control entirely free from contamination. 30 minutes of recording time represents 2 hours of intermittent operation.

4. **CLINICAL REPORTS**—Solve the problem of up to date reports by having a Tape-Riter constantly available to doctors.

5. **ADMINISTRATION**—Tape-Riter with the new "Miracle Microphone" takes dictation easier, faster; more economically than any other dictating system.

Every Tape-Riter is a dual purpose machine, dictator and/or transcriber.

For further information or a demonstration, consult the yellow pages in your local telephone directory or write

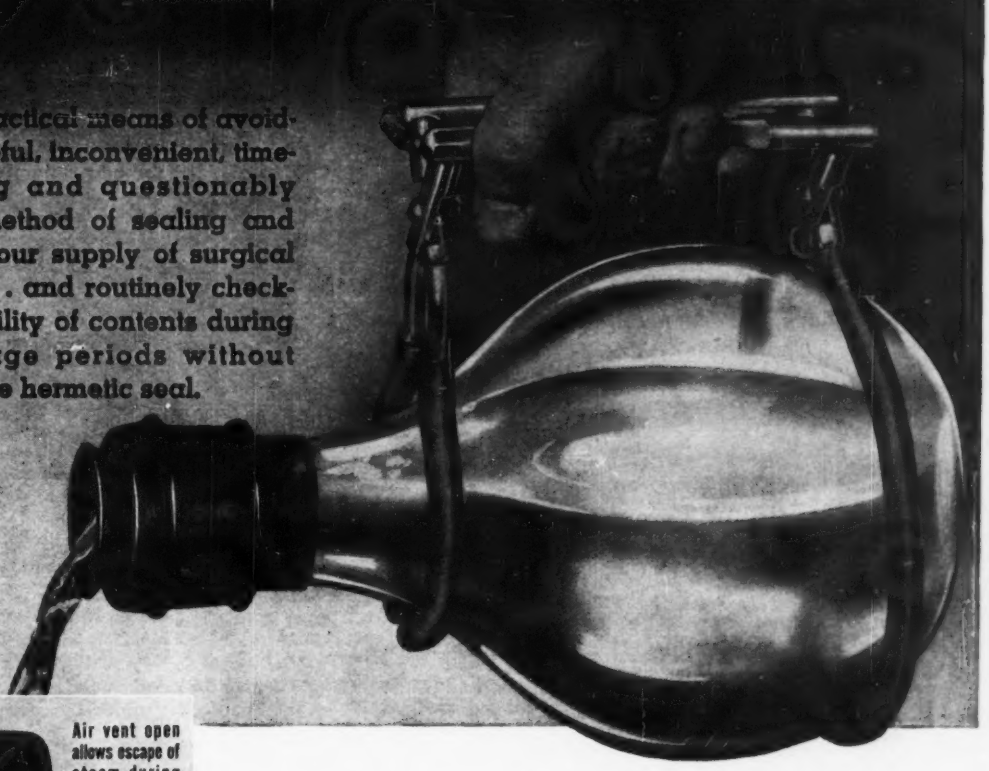
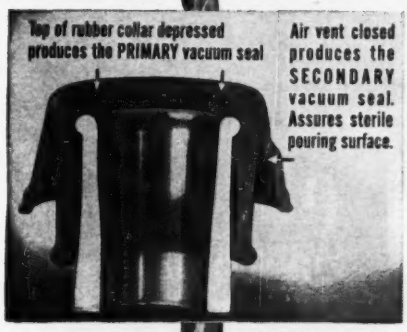
Only POUR-O-VAC SEALS

afford a practical means of avoiding a wasteful, inconvenient, time-consuming and questionably scientific method of sealing and handling your supply of surgical solutions . . . and routinely checking the sterility of contents during long storage periods without breaking the hermetic seal.





CONTENTS POUR FROM A STERILE LIP

. . . and with it goes

1. **Supply Conservation** . . . provides dustproof seal for remaining fluid when only partial contents of a container are used.
2. **Supply Conservation** . . . eliminates need to utilize gauze, cotton, paper, string or tape to effect makeshift seal of questionable efficiency.
3. **Supply Conservation** . . . reduces possibility of breakage or chipping damage to lips of Fenwal containers.
4. **Supply Conservation** . . . POUR-O-VAC SEALS* are reusable . . . may be sterilized repeatedly . . . interchangeable for use with 500, 1000, 1500, 2000, 3000 ml. FENWAL containers.

*A product of Fenwal Laboratories, Inc.

"Might as well heat these rooms with old-fashioned stoves!"

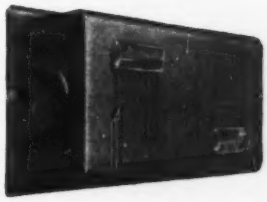
WHAT in the world is this hospital board member talking about? Listen: *"Without Honeywell Individual Room Temperature Control, our new hospital will actually be out-dated before we open the doors. And now that we know this modern system will only cost between ½ and 1% of our total expenditure, I say we will be making a serious mistake if we don't install it now!"*

Is this an overstatement? Not as much as you might think—here's why!

Today, in many hospitals, it is already routine medical practice to give each patient the exact room temperature he needs to speed his convalescence. This can be done only if every room has its own thermostat. No other method can compensate for the varying effects of wind, sun, open windows and variations of internal load in each room.

Since that is true, it's just smart business to install individual room temperature controls *when your hospital is being built.* Doing it later, as a modernization project, is sure to cost substantially more money.

For complete facts and figures on Honeywell controls for your hospital, call your local Honeywell office—there are 12 of them located in key cities from coast to coast. Or for literature, write Minneapolis-Honeywell, Dept. CH-553, Leaside, Toronto 17.



Only thermostat specially designed for hospitals!

No other thermostat offers hospitals all these features:

- *"Nite-Glowing dials"* permit inspection without disturbing patients.
- *Magnified numerals* make readings easy to see.
- *New Speed-Set control* knob is camouflaged against tampering.
- *Air-Operated;* requires no electrical connections.
- *Lint-Seal* insures trouble-free and dependable operation.

Sold by leading dealers everywhere

BREAD TOASTER

9-12 Slices per minute—Gas and Electric Models—Produces up to 540, 4½" x 4½" slices, or 720, 3⅝" x 4½" slices per hour.

Fuel Consumption—MODEL PQ—Gas: 20,000 B.T.U. per hour. **MODEL CT-4**—Electric: 2,700 Watts average hourly consumption. Maximum 3,600 Watts. **Dimensions:** Height 29⅜", Width 23⅝", Depth 16⅝". **Shipping Weight:** 125 lbs.

MODEL PD
BREAD TOASTER

6 Slices per Minute

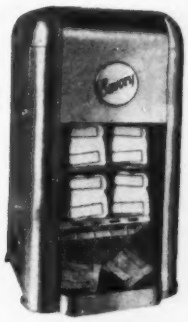
Gas Model

Produces 360 slices per hour

Fuel Consumption 12,000 B.T.U. per hour

Dimensions: — Height 29⅜", Width 18⅝", Depth 16⅝"

Shipping Weight: — 116 lbs.



MODEL CT-2
BREAD TOASTER

6 Slices per Minute

Electric Model

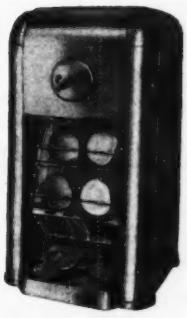
Produces 360 slices per hour

Fuel Consumption 1,940 Watts average hourly consumption. Maximum 2,640 Watts

Dimensions: — Height 29⅜", Width 18⅝", Depth 16⅝"

Shipping Weight: — 116 lbs.

FOR YOUR SNACK BAR OR RECREATION ROOM



MODEL XBB
BUN TOASTER

6 to 9 half buns per Minute
gas model

Fuel Consumption 12,000 B.T.U. per hour

Dimensions: — Height 29⅜", Width 18⅝", Depth 16⅝"

Shipping Weight: — 110 lbs.

MODEL CTX-2
SANDWICH AND BREAD TOASTER

6 Sandwiches or Slices per Minute

Electric Model

Fuel Consumption 1,980 Watts average hourly consumption. Maximum 2,640 Watts.

Dimensions: — Height 29⅜", Width 18⅝", Depth 16⅝"
Shipping Weight:—116 lbs.

Mount Sinai Hospital, New York,

speeds surgical reports the new fashioned way!

From the end of an operation to the typed record in one hour! That's the remarkable new service being rendered these days by the EDISON TELEVOICE installation at New York's famed Mount Sinai Hospital. A TELEVOICE station, just outside the operating rooms, serves each surgical floor. The moment an operation is finished, the surgeon can relax, pick up the small, handy TELEVOICE phone . . . and dictate! In another building, his voice is recorded and transcribed in a secretarial pool. A complete typed report is at work for the patient's benefit within an hour!

Better, faster records with TELEVOICE ease! Clear, complete reports flow-in automatically to Mount Sinai's secretarial pool. Hospitals from coast to coast report they're turning out better, more detailed records in ⅓ the time. And doctors like . . . and use . . . the easy, phone-design.

THE NEW FASHIONED SYSTEM OF PHONE DICTATION IS TELEVOICE!

Only Edison makes TELEVOICE, *the proved* Clinical Recording System for *better* medical records. Thousands of doctors, hospital administrators and medical record librarians agree: TELEVOICE means better records and better records mean better medicine. Take a moment to learn the whole story . . .

Get "THE NEW FASHIONED WAY to better medical records". This booklet shows you how TELEVOICE can solve the medical record problem in *your* hospital. It's yours without obligation. Just send the coupon—filled out or clipped to your letterhead. Mail it today !

Switchboard efficiency to meet your needs!

No. 555

PRIVATE BRANCH EXCHANGE

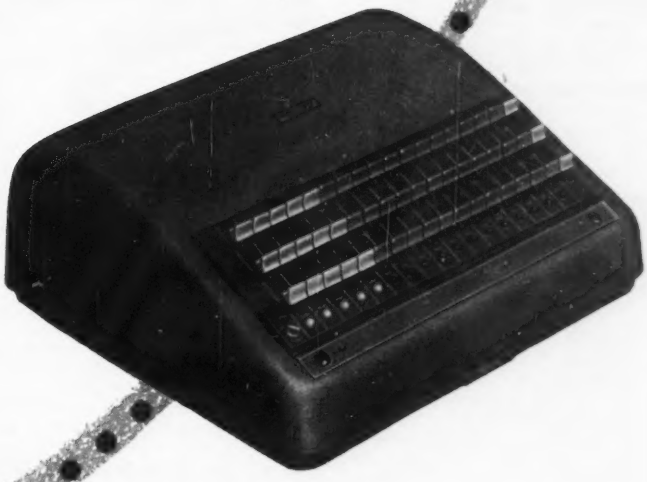
This is a modern switchboard with the new "plug-in" type units, permitting actual service requirements to be closely met.

Available in capacities of

60 and 120 Station Lines
14 Central Office Trunks
15 Cord Circuits

Two positions may be installed side-by-side to increase the maximum capacity to 240 lines.

The low design makes it convenient for attendant-receptionists to converse with employers' visitors or client over the top of the switchboard.



No. 507

PRIVATE BRANCH EXCHANGE

A small compact switchboard with a capacity of

12 Station Lines
5 Central Office Trunks
5 Connecting Circuits.

Requires about the same amount of space as the average typewriter.

Convenient and simple to operate by an attendant with other duties.

Northern Electric

For Higher Standards . . . and Lower Cost per Serving . . .

look to HOBART *FOOD & KITCHEN MACHINES!*

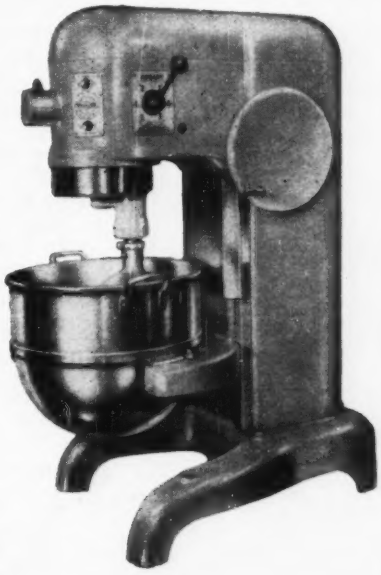
"Every Serving's a Saving with Hobart on the job!"

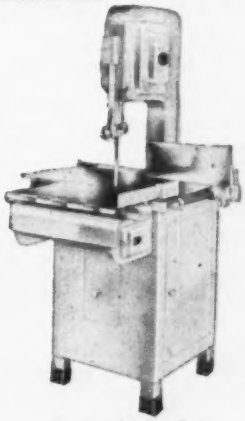
Cost per serving goes down—standards go up—meals are enhanced in appearance and appeal when Hobart food and kitchen machines go to work for you. They cut costs by saving time and labor . . . increasing output . . . outperforming the field on every kitchen task. And for purchase economy check this: Hobart's complete line includes a model and size for every application. You save by choosing the capacity and power best suited to your needs—all from a single source!

Steakmaker

Develop food quality . . . enhance flavor with HOBART MIXERS!

Hobart Mixers take the drudgery out of kitchen work . . . release help for other duties . . . improve food quality and flavor ! Such tasks as mashing potatoes, whipping cream, meringue or roll dough, pie dough, cookie batter and mayonnaise, etc. are handled with speed and ease by Hobart Mixers. And a broad line of easy-to-use attachments greatly extends the usefulness of your Hobart Mixer . . . eliminates the need for expensive auxiliary equipment. Model L-800, illustrated, features an Automatic Timer which shuts off Mixer in any speed. New streamlined body of this 80-quart giant permits faster, top-to-bottom cleaning, while famed Hobart Planetary Action gives you precise, uniform blending, mixing and aerating of all ingredients.





Power Meat Saw

Bring new speed and efficiency to your dishwashing operations!

With a fast, automatic Hobart dishwasher installation, kitchen help can be cut down or released for other duties. Moreover, Hobart Dishwashers meet highest standards of sanitation and safety . . . eliminate costly breakages and towelling expense. Every Hobart Dishwasher—(there is a model for every kitchen layout and capacity requirement)—is performance-packed with features tested and proved in countless installations throughout the world. Model XM-4, illustrated, is ideal for use where space is limited, yet thousands of dishes must be washed in a short time. Fully automatic. Double action rinse, ball bearing motor and pump unit.

CRANE—fixtures and fittings specially developed for specialized hospital services

This pedal action control mechanism provides a typical example of the complete variety of the Crane equipment which has been designed in co-operation with surgeons and hospital administrators.

Available for your selection in the complete line are, for example, such specialized hospital fixtures as continuous flow baths, arm and leg baths, sitz baths, contrast baths and hydrotherapeutic showers.

In it, too, are a wide range of sinks and baths of Crane-developed *Duraclay*—that resists abrasion, acid, stain and thermal shock.

Ask your Crane Branch, wholesaler or plumbing and heating contractor. Copies of Crane's Hospital Catalogue gladly supplied on request.

CRANE the *preferred* plumbing and heating

PRESENTING THE

Galileo Microscope

MODEL TCT

(BINOCULAR TYPE)

With Built-In
Graduated Mechanical Stage

This microscope is available with various combinations of objectives and eyepieces. We list below three TCT models, with the most commonly used optical equipment. Each microscope supplied in finished hardwood case with lock and key.

Catalogue No.	Revolver	Objectives	Eyepieces	Condenser	Price
A91-000	Triple	Achromatic 10.5x, 42x, 100x, (oil imm.)	Huyghenian 4.6x, 5.8x, 10.0x	Abbe 1.20 N.A. with iris diaphragm	**$368.00**
A91-005	Quadruple	Achromatic 3.5x, 10.5x, 42x, 100x (oil imm.)	Paired Huyghenian 4.6x, 5.8x, 10.0x	Abbe 1.20 N.A. with iris diaphragm	**380.50**
A91-010	Quadruple	Achromatic 3.5x, Apochromatic 11x, *45x, 90x (oil imm.) *with correction collar	Compensating 5.6x, 8.3x, 11.0x	Achromatic 1.40 N.A. with iris diaphragm	**515.50**

A91-015. Monocular graduated drawtube readily interchangeable with binocular head. **Price $12.00**

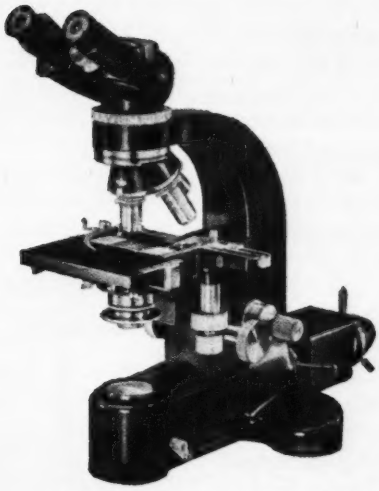
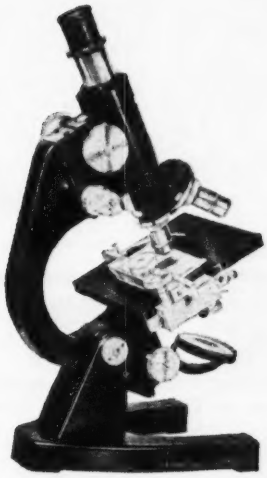
OCCUPATIONAL THERAPY MATERIALS—TOOLS
Crescent Surgical Sales Co., Inc., New York, N.Y.



The new "DIALUX" Microscope with built-in illumination. Greatly in demand by pathologists.

Standard Laboratory Microscope model BST-48/79 with inclined binocular eyepieces. Cheaper than Dialux. For use in smaller hospitals.



Standard Monocular Microscope model GT-26/92 for the medical student and practicing physician.

"PANPHOT" Photomicrographic Apparatus — combined microscope and camera.

Leitz—the greatest name in precision instruments

Leitz Microscopes, *manufactured for more than 100 years,* are recognized the world over as precision instruments of highest quality that embody the latest improvements optical science can provide.

Precision and quality are the dominating factors in the manufacture of Leitz microscopes. These universally respected standards are carefully maintained through vigorous and constant inspection.

As the owner of a Leitz Medical Microscope, you are assured of efficient, precise service during a lifetime of use. Each instrument is guaranteed against any defect in optical or mechanical construction. *Here in Canada, we maintain complete mechanical and optical repair facilities* so that you can always be sure of genuine parts and expert workmanship.

GARLAND

Leader In Commercial Cooking Equipment For Hospitals

**All Garland Ranges can be equipped for natural, manufactured or LP gas.*

Select from 62 models, any number of different combinations. All fired with gas—the ideal fuel.*

(Right) Spectro-Heat Hot Top Range, Model No. 45-29. Seven individually controlled front-fired burners provide the heat you select, where you want it. Can't be beat for faster, better, more economical cooking. Finished in black japan, as illustrated, or stainless steel. (Available also in open top and fry top models.)

(Left) Restaurant Range, Model No. 183. Biggest value in an all-purpose restaurant-type range. Range illustrated has two ovens, griddle, broiler and six king-size burners. Automatic lighting. Automatic oven heat control. (Other models offer up to ten open-type burners and three Hot Top sections.)

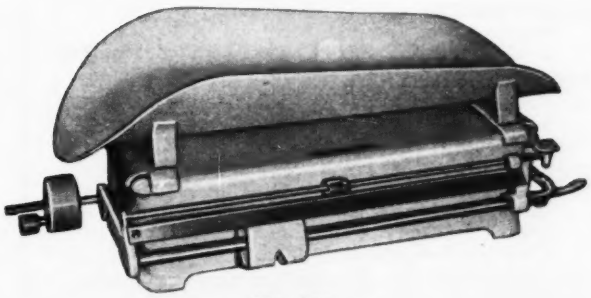
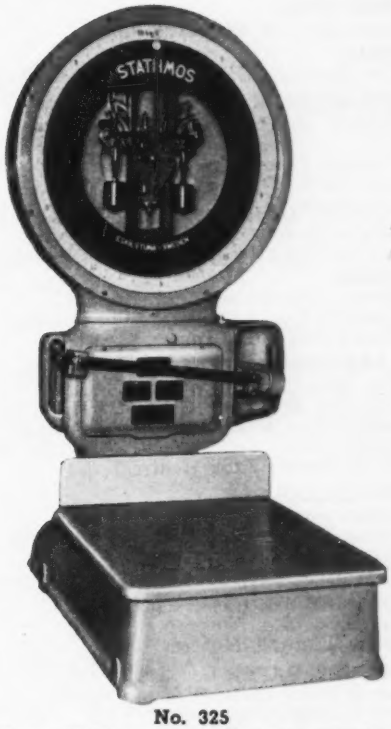
STATHMOS

MANUFACTURERS OF SCALES SINCE 1898

No. 300
Supplied with measuring rod
4 oz. x 280 lbs.



No. 391
¼ oz. x 33 lbs.



No. 325
From 50 lbs. up to 250 tons capacity.

THE FIRST IN DESIGN is our proud achievement. We introduced to the world the first dial-scale with double pendulum system. We designed our baby and personal scales in close cooperation with leading physicians and pediatricians and we now have what the profession considers **THE IDEAL. LOOK** at the personal scale and its hinged platform which folds and locks, for easy moving. LOOK at the easy-reading beam with two-side graduation. LOOK at the beautiful style and the matching colors in white and light green.

THE FINEST IN WORKMANSHIP is the pride of our highly skilled tradesmen, who, with their many years of experience, turn out every part to a perfection and yet the finished product is so low in cost.

THE FOREMOST IN QUALITY has allowed us to guarantee our scales for a period of TWO YEARS and their reputation is known the world over and are accepted as:

THE DEPENDABLE — THE PRECISION-MADE

A STATHMOS SCALE WILL MAKE YOU — THE PROUDEST OF ALL.

Contact your dealer today or write to the Canadian Sales Office:

Air entering hospital operating rooms

MUST BE CLEAN!

*Precipitron electrostatic air cleaners are in constant use in hospitals across Canada . . . guarding operating room equipment and delicate instruments against air-borne dirt particles, that find their way into hospital ventilating systems. Precipitron quietly and effectively removes even the smallest particles (down to $\frac{1}{250,000}$ part of an inch) insuring against airborne infection to the greatest possible extent.

*Registered.
